Anuska Hadkhale

Student

I am an enthusiastic and committed web developer, deeply rooted in the craft of building dynamic and user-centric websites and applications. My journey in web development is driven by a profound attention to detail and an unwavering dedication to writing clean, efficient code. I have been on a continuous path of learning and growth. Initially captivated by the endless possibilities of the digital world, I started by learning the basics of HTML and CSS, and JavaScript and will be learning more. My curiosity and drive to create comprehensive solutions led me to explore more technologies, that I hope in coming days I will be a well-rounded developer capable of handling the full stack of web development.

PROJECTS

○ Websites Using HTML,CSS And JavaScript

I have developed some of the simple websites Using HTML,CSS and Js and currently learning React Js
